

Added value in wide widths

Innovative coating and laminating of textiles, paper, films, foams and composites.

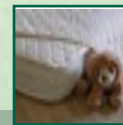

Acoustic materials • Advertising specialties • Anti-slip coverings • Automobile accessories • Automobile headlinings

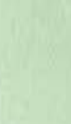

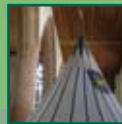

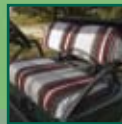

Belts • Blacking-out materials • Blinds • Book covers • Boot lining • Bridles • Camping articles

Curtains • Decoration articles • Decubitus ulcer aids • Diaphragm materials • Digital print substrates • Door linings • Edge trims

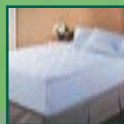

Footfall sound protection • Formed parts • Garden furniture • Gift articles • Gloves • Helmet lining • Home textiles

Ladies' fashion • Lagging • Lampshades • Latex • Leather goods • Leisure articles • Light reflection material • Light shields • Lining materials • Linings

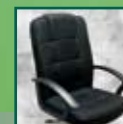

You make the markets

Loudspeaker diaphragms • Machine covers • Mattress material • Moisture protection • Motor cycle clothing • Music instrument cases

Nursing materials • Operating theatre clothing • Orthopaedic products • Packaging material • Painters' requirements

Reflection surfaces • Reinforcing material • Roofing underlay • Roof sheeting • Saddlers' requirements • Sailing equipment • Screens

Sun visors • Table linen • Tent fabrics • Textiles • Thermal insulation • Toys • Traffic safety articles • Underlay material • Upholstery fabrics • Upholstery materials

•Automobile interior trim and upholstery •Bags •Bank strengthening material •Banner material

•Cases •Chemical filters •Climate membranes •Collar-stuffing material •Construction auxiliaries •Covers •Cream piping bags •Crimping cloth

•Emergency equipment •Fashion materials •Filter material •Fire protection •Flap material •Foam

•Hospital textiles •Hunting equipment •Incontinence requirements •Industrial products •Industrial protection •Insoles •Insulation layer

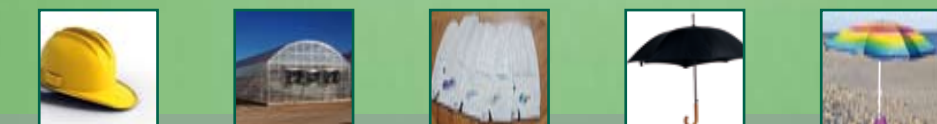

Innovations source KLUTH.

With new ideas you can create new markets or defend profitable market positions. Often it is apparently small improvements to material properties that make the big difference. In processability, in customer acceptance or not least in the price that can be achieved. Whenever it is a matter of a textile or other flexible material - it pays to contact KLUTH.

From A to Z there are many things to talk about.

•Panelling •Planning tables •Polishing discs •Promotional presents •Protective clothing •Purses •Rain protection

•Seat covers •Shoe materials •Sound insulation •Sports equipment •Sportswear •Suitcases •Sunscreens

•Wallpaper •Washing instruction labels •Watersport articles •Weather strips •Wintersports articles •Work clothes •Yachting equipment

Turn our ideas into your solutions.

KLUTH stands for innovation and efficient functional products in the fields of laminating, coating and upgrading textiles, paper, films, foams and composites.

As your development partner we will find the added value that your market will honour.

Resistant to low temperatures

Stiffening

Resistant to greases/oils

Suitable for HF welding

Self-adhesive

Washable

Slip-resisting

Wear-resistant

| Flat-bed laminating systems with laminating calender |

| Thermoplastic powder coating and laminating systems |

| Direct coating systems for water-based coatings |

| Cylindrical laminating system |

Experts for customer added-value

| PVC coating system for direct and transfer coatings |

| Gravure roll system for hot-melts |

| Flat-bed laminating systems with flexographic printing roller system |

Good to look at. Our systems

Our flexible trains of machines enable us to go into your problems rapidly and expertly and thereby to find the optimal solution for you. Whereby we can laminate textiles, non-wovens, films and foils, paper and expanded materials at widths up to 240 cm or coat them at widths up to 185 cm.

Manifold adhesive-application and coating systems are at your disposal for, amongst others:

•Reactive polyurethane hot-melts •Reactive polyurethane thermoplastics •Thermoplastic clustered adhesives •Films/foils and non-wovens •Dispersion adhesives •PVC plastisoles •Aqueous plastic dispersions

From the appropriate combination of machines, substrates and adhesive systems we are able to achieve products that are perfectly matched to your requirements.

For customized properties.

Good to know. Our experience

Many decades of experience, the latest know-how and highly qualified employees in combination with modern, flexible plant and systems make it possible for KLUTH to satisfy each of your requirements in consistent and certified quality and to deliver just-in-time. And that all this is done with proper account being taken of environmental requirements can be taken as read.

Thanks to continuous investment, what began 75 years ago with the formation of a trading company has long changed into a modern, flexible medium-sized enterprise in which orientation to the customer stands centre-stage.

Because only through perfect service are real “bonds” to be produced.

All this makes us into one of the top addresses for coating and laminating.
